Wall connector panels

Connector panels for wall channels

Angled wall connector panel

Connector panel, which is often installed in a wall channel. Because of the angled design the plugs do not protrude and are secured so before „tear-off“ or „stay tuned hang“.

Following versions are available:

- 8TE wall channel angled
- 20TE wall channel angled
- 28TE wall channel angled

Mounting and labeling optional.

Wall connector panels

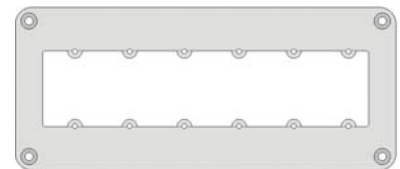

Other lengths and assignments available. (e.g. with power sockets)
